

WB New Gen Products completed pre-research

In order to well meet the market demand, the WB team completed the pre-research of the new generation of electric drive system. The new products achieves independent design breakthroughs in parking lock system integration, compact design layout, and two-speed technology. The first trial sample and verification will be completed recently. It is expected that the product will be applied for the first cooperation project with Shanghai Xichi Technology.

蔚邦新一代产品完成预研

为更好满足市场需求，蔚邦团队完成了新一代电驱传动系统的预研。新一代产品在驻车系统集成，紧凑型设计布局，以及两档技术上实现自主设计突破。相关产品将于近期完成首期样品试制和验证工作。预计该产品将在与上海曦驰科技的合作项目上获得初次的市场应用。

PV Sample Launched Off 2nd Line

蔚邦2nd Line PV样件顺利下线

In May, the Weibang team encountered unprecedented challenges. The Shanghai epidemic caused the delay in the delivery of equipment for 2nd line. WB team fully practices the struggle culture and makes concerted efforts. Finally, on June 6, we realized the smooth

production of PV samples of 2nd line. Looking back on the past month, with the full cooperation of all departments, we carefully studied and jointly formulated the "temporary glue dispensing scheme", "PV test scheme", "tightening tool replacement scheme" and so on. During the implementation process, the team provided customer service for various difficulties, repeatedly verified and summarized to ensure that the new production line has PV production conditions. In the end, the hard work has yielded fruitful results. I would like to pay tribute to all the small partners who ensure the smooth production of the new production line.

5月，蔚邦团队遭遇了前所未有的挑战，上海疫情造成2号产线设备交付延期。蔚邦团队充分践行奋斗文化，齐心协力。最终在6月6日这样一个充满美好寓意的日子里，我们实现了2号产线的PV样件顺利生产。

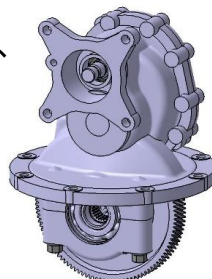

回首过去的一个月，在各部门的通力协作下，我们认真研究，共同制定了“点胶临时方案”，“PV测试方案”，“拧紧工具替代方案”等等。在实施过程中团队客服种种困难，反复验证总结，确保新产线具备PV生产条件。最终辛勤的汗水换来了丰硕的成果，在此向所有保障新产线顺利生产的各位小伙伴致敬。（编辑 李文伟 Edit by Augus.Li）

Co-Development TOP Edrive Palyer&WB

蔚邦&某头部企业联合开发

One TOP Edrive Player plans to jointly develop the electric drive axle system with our company and apply it to the rear drive axle of non pedestrian vehicles. Electric drive axle has the advantages of high integration, small size and low energy consumption. Its performance directly affects the power and economy of electric vehicles. The figure is the initial drawing of the reducer assembly developed by our company.

电驱动桥具有集成化程度高、体积小、能耗低等优点，其性能直接影响电动汽车的动力性和经济性。某头部企业计划与我司联合开发电驱动桥系统，应用于无人物流车后驱动桥，图为我司负责开发的减速箱总成初始图。

Optimization of 2nd line

产线优化改进

Based on the experience of the previous line 1, when designing and manufacturing the second production line, Weibang united equipment manufacturers improved some equipment and processes to achieve higher production efficiency and reduce quality risk. For example, the cylinder is changed into an electric cylinder for press mounting to ensure the shell insertion speed and so on to reduce the quality risk. It is believed that the new line will create benefits for the company with a more efficient attitude.

基于之前1线的经验，在设计制造第二条产线时，蔚邦联合设备制造厂商对部分设备及工艺进行了改良，以达成更高的生产效率及降低质量风险。如将气缸改成电缸压装，以保证入壳速度等等以降低质量风险。相信新线会以更加高效的姿态为公司创造效益。
